SUMMARY

Experienced in product and program management, web development, configuration management, web analytics, SEO, and community and ecosystem management. Passionate about open source with active involvement in the Drupal community. Known for strong organizational skills, clear communication, and efficient delivery across full product lifecycles and cross-functional teams.

WORK EXPERIENCE

Sr Developer Programs Engineer, Dynatrace
Jan 2026 - Present

- Rebranded the Open Ecosystem Discourse community to OffOn and restructured its categories, navigation and gamification from community metrics
- Built offon.dev, the OffOn community's landing site, in React and successfully migrated to Astro
- Built AI automation for community operations: content generation, community digests and metrics reports

Product Manager, drunomics
June 2023 - November 2025

- Managed the launch of mossbo, a fully managed cloud CMS with AI-powered tools, coordinating a cross-functional team of developers, designers and marketers
- Defined and documented the product lifecycle process in collaboration with management
- Worked closely with clients and developers to clarify requirements, prioritize tasks and ensure smooth project delivery
- Contributed to automated testing using Playwright and frontend development with Nuxt and Tailwind to ensure consistent product quality
- Managed the end-to-end launch of 4 projects on mossbo, overseeing requirements, timelines, stakeholder communication and created documentation to support each project launch

Software Developer & Configuration Manager, Jobiqo
Jan 2021 - May 2023

- Developed and maintained Drupal-based job board websites, handling both backend and frontend
- Led the UI and frontend implementation for a client job board website relaunch on Drupal
- Configured and integrated Google APIs, Analytics, Tag Manager, Search Console, Social Logins, and Usercentrics CMP with client websites and monitored SEO performance
